Greek is tough.

It is tough to learn and tough to keep. After two years of biblical Greek in college, I was eager to use the New Testament's original language in my teaching and preaching ministry. God's people need God's Word, and I had invested time and treasure in this tool in order to bring it to them with accuracy and clarity.

But that's not what I did. I was a new husband. And I was a new youth pastor. There was much to learn. For the busyness of life and, no doubt, a lack of discipline, Greek became, once again, a foreign language. I found no encouragement in my 300-page Greek grammar or in two inches of class notes. Both stayed on the shelf. So did my Greek New Testament. And that's the story of countless well-meaning former students of biblical Greek.

Thankfully, seminary provided another shot at learning the language. Determined to keep what I was having to relearn, I created a series of one-page study guides for personal reference. I worked through the grammar and weighed the relative importance of certain points. I considered how to arrange the critical material visually, simply, and memorably. As I developed these charts, I discovered that I was not alone in being helped by a resource like this. So, what began as a personal project is now this reference guide.

Graphical Greek does not replace a standard biblical Greek grammar, but neither is this just a several page list of word forms and rules in black and white. *Graphical Greek* really is something in between. By visually organizing the most important points of Greek grammar, *Graphical Greek* helps teachers teach, students learn, and pastors use the New Testament's original language.

Greek is tough. But, of course, it is worth the effort. The church needs the Word. After all, "man does not live by bread alone, but by every word that comes from the mouth of God" (Luke 4:4).

FEATURES

Need-to-Know Content for each major division of grammar compiled into a single page.

Colors are used throughout to indicate case for the noun system and tense for the verb system.

Formation Notes and Function Notes summarize the need-to-know morphological and syntactical information.

Formation Funnels show how verbs are formed by progressively displaying grammatical information.

Formation Rule Bars are found at the top of verb funnels to indicate the various parts of a verb and the rules that govern each of those parts.

Meaning Keys visually represent the meaning indicated by a verbal ending given its tense.

CASE ENDINGS

Singular	n	ος	η	α	ον	ς/-
	g	ου	ης	ας	ου	ος
	d	φ	η	α	φ	ι
	a	ον	ην	αν	ον	α/v
Plural	n	οι	αι	α	ες	α
	g	ων	ων	ων	ων	ων
	d	οις	αις	οις	σι(v)	σι(v)
	a	ους	ας	α	ας	α

DEFINITE ARTICLES

	2m	1f	2n		
Singular	n	ὁ	ἡ	τόϛ	“the”
	g	τοῦ	τῆς	τοῦ	
	d	τῷ	τῇ	τῷ	
	a	τόν	τήν	τόϛ	
Plural	n	οἱ	αἱ	τά	
	g	τῶν	τῶν	τῶν	
	d	τοῖς	ταῖς	τοῖς	
	a	τούς	τάς	τά	

Formation Notes

- Declensions:
 1. Stems ending in α, η = 1st declension.
 2. Stems ending in ο = 2nd declension.
 3. Stems ending in a consonant = 3rd declension.
- Similarities:
 1. All **nominative** and **accusative** neuters are identical.
 2. Almost all **nominative** and **accusative** neuter plurals end in α.
 3. All **datives** share an “ι” which subscripts in the singular if possible.
 4. All **genitive** and **dative** neuters are identical to their masculine counterparts.
- Changes:
 1. Vowels often change length (“ablaut”).
 Contraction: when two vowels meet to form a diphthong.
 Compensatory lengthening: when a vowel lengthens to compensate for the loss of a letter.
 2. Square of stops:
 π β φ + σ → ψ
 κ γ χ + σ → ξ
 τ δ θ + σ → σ
 3. The τ drops off at the end of a word.
 τ & ν drop off when followed by a sigma.
 Consonants that can end a noun are ν, π, ς (ψ, ξ).

**This is a modification of Bill Mounce's seven noun rules.*

Function Notes

- Case functions: Endings, not word order, determine meaning.
 - Nominative**: Subject, predicate nominative.
 - Genitive**: Possession (“of”), object of preposition, direct object, separation (“from”).
 - Dative**: Indirect object (“to/for”), object of preposition, direct object, instrumental (“by/with”), locative (“in/at”).
 - Accusative**: Direct object of the verb, object of preposition, subject of infinitive.
- Articles: An article will always agree in case, number, and gender with the noun it modifies. If the definite article is absent, the indefinite article, “a,” may be inserted before a noun if it makes better sense. Articles before proper names (God, Paul) and abstract nouns (truth) may be omitted in translation.

*ὑπέρ	“in ‘behalf of’”

With the Dative

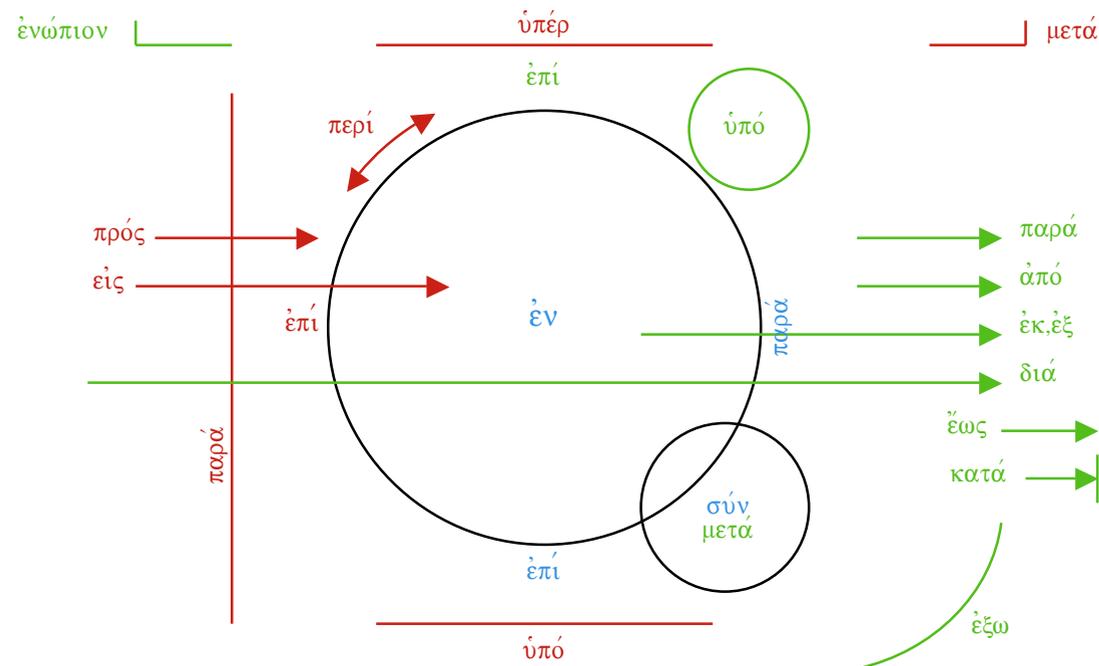

ἐν	“in, on, among”
σύν	“with”
παρά	“beside, in the presence”
ἐπί, ἐπ', ἐφ'	“on the basis of, at”

With the Accusative

ὑπέρ	“above”
περί	“around”
πρός	“to, with, toward”
εἰς	“into, in, among”
ἐπί, ἐπ', ἐφ'	“on, to, against”
ὑπό	“under, below”
παρά	“along side of”
μετά	“after”
*κατά	“according to”
*διά	“on account of”

*Not in visual

VISUAL DIAGRAM OF PREPOSITIONS

*This diagram is a memory aid, providing a visual representation of most prepositions and not just those prepositions whose meaning is spatial.

Formation Notes

- The meaning of a preposition is determined by the case of its object.

Function Notes

- The word following a preposition is the “object of the preposition.”
- Preposition + word = Prepositional phrase. A prepositional phrase answers the question, Who? Which? When? Where?
- An article followed by a prepositional phrase should generally be translated as a relative clause: “who,” “which,” etc.
- Meanings: Prepositions with the **genitive** generally indicate *motion away from*. Prepositions with the **dative** generally indicate *rest*. Prepositions with the **accusative** generally indicate *motion*.

CHANGE RULES

Contracts (α, ε, ο)

- Contract + Connecting Vowel → Contract:
o + o, o + ε, ε + o → ου; ε + ε → ει; o/ω + __ → ω̂ ("o" sound wins);
α + ε → ᾶ, ε + α → ῆ (first wins); οει → οῖ
- Contract (α, ε, ο) + Sign/Ending → Lengthen:
α + __, ε + __ → ῆ + ending; ο → ῶ + ending

Intervocalic σ: When a "σ" gets forced between two vowels, because of inflection, it drops out. Vowels then contract (σαι = η). This does not apply for tense signs starting with σ.

Square of Stops + σ:

π β φ	+ σ =	ψ
κ γ χ	+ σ =	ξ
τ δ θ	+ σ =	σ

FINISHED FORMS

Act	λύειν	λύσαι	λαβεῖν	λελυκέναι
Mid		λύσασθαι	λαβέσθαι	
Pass	λύεσθαι	λυθῆναι	λαβῆναι	λελύσθαι

Formation Notes

- Parse: tense, voice, “infinitive.”
- Always indeclinable (no case endings), but is viewed as neuter singular.
- When preceded by a definite article, the articles are always neuter singular with case being determined by function.
- All forms end in αι, except **present** and **2aor active**.
- Irregular contracts in **present active**: alpha contracts form αν instead of αν. Omicron contracts form ουν instead of οιν.

Function Notes

- No time significance, only aspect:
Present=Continuous; **Aorist**=Undefined
Perfect=Completed action with ongoing implications.
- Since nuances are near impossible to translate into English, the **present** (“to __”) will work for both **present** and **aorist**.
- As a non-finite verbal form (not limited by a subject) it cannot have a subject. There is often a noun in the accusative acting like a subject. Context distinguishes subject from direct object.
- Use μή for negation (as with all non-indicative verbs).
- 5 ways to translate: see key word/article.

QUICK REFERENCE GUIDE
FOR BIBLICAL GREEK

Graphical Greek is a quick reference guide for biblical Greek that consolidates and visually organizes the crucial data found in a standard introductory Greek grammar. Students and teachers will find this reference guide helpful in the acquisition and use of the New Testament's original language.

"Trent Hunter has written a helpful tool for those studying Greek. We know that learning a new language is no easy task, and this work provides wonderful practical assistance to those who desire to study the New Testament in the original language."

THOMAS R. SCHREINER

Professor of New Testament Interpretation
The Southern Baptist Theological Seminary

"This is certainly something I wished I had had when studying Greek. This is an excellent resource!"
